

A Tradu Liter Ia

L'ouvrage présente la première édition critique, traduction annotée et étude du *Kitāb dī'irāt al-a'rūf al-abjadiyya* attribué à Hermès, texte de magie pratique basée sur la science des lettres (*'ilm al-urūf*). This book provides a critical edition and translation of the *Kitāb dī'irāt al-a'rūf al-abjadiyya*, a treatise of practical letter magic attributed to Hermes, giving anyone interested in magical traditions a way to understand the intricacies of the science of letters (*'ilm al-urūf*).

This international encyclopedia documents and surveys, for the first time, the entire complex of translation as well as the operations and phenomena associated with it. Structured along systematic, historical and geographic lines, it offers a comprehensive and critical account of the current state of knowledge and of international research. The Encyclopedia (1) offers an overview of the different types and branches of translation studies; (2) covers translation phenomena - including the entire range of interlingual, intralingual, and intersemiotic transfer and transformation - in their social, material, linguistic, intellectual, and cultural diversity from diachronic, synchronic, and systematic perspectives, (3) documents and elucidates the most important results of the study

of translation to the present day, as well as the current debates, taking into account theoretical assumptions and methodological implications; (4) identifies, where possible, lacunae in existing research, listing priorities and desiderata for further research. The languages of publication are German, English, and French

Text Analysis in Translation has become a classic in Translation Studies. Based on a functional approach to translation and indebted to pragmatic text linguistics, it suggests a model for translation-oriented source-text analysis applicable to all text types and genres independent of the language and culture pairs involved. Part 1 of the study presents the theoretical framework on which the model is based, and surveys the various concepts of translation theory and text linguistics. Part 2 describes the role and scope of source-text analysis in the translation process and explains why the model is relevant to translation. Part 3 presents a detailed study of the extratextual and intratextual factors and their interaction in the text, using numerous examples from all areas of professional translation. Part 4 discusses the applications of the model to translator training, placing particular emphasis on the selection of material for translation classes, grading the difficulty of translation tasks, and translation quality assessment. The book concludes with the practical

analysis of a number of texts and their translations, taking into account various text types and several languages (German, English, Spanish, French, Italian, Portuguese, and Dutch).

This book contains studies of the social, cultural, and religious history of the Jews in the Graeco-Roman world. Some of the sixteen contributors are specialists in Jewish history, others in classics. They tackle from different angles the extent to which Jews in this period differed from other peoples in the Mediterranean region, and how much Jewish evidence can be used for the history of the wider classical world. The authors make extensive use not only of types of evidence familiar to classicists, such as inscriptions and the writing of Josephus, but also Jewish religious literature, including rabbinic texts. The various studies

demonstrate that, although Jews lived to some extent apart from others and with distinctive customs, in many ways this showed the cultural presuppositions and preoccupations of their gentile contemporaries. The book aims to encourage wider use of the Jewish evidence by classicists and will be important for all students of the classical world.

Bourdieu's key concepts of habitus, field and capital have been adopted or adapted to elaborate the social and cultural nature of translation or interpreting activity, to locate this activity within social structures and social institutions, and to analyse the cultural, historical and political specificity of translation and

interpreting practices. This special issue of *The Translator* explores the emergence and subsequent development of Bourdieu's work within translation and interpreting studies. Contributors to this volume offer their critical assessment of the force of Bourdieu's arguments in clarifying, strengthening or challenging existing analyses of the role of the social in translation and interpreting studies. The topics include a consideration of the role of habitus and symbolic/linguistic capital in translation and interpreting within the legal field; a critical evaluation of how educational sign language interpreters serve to reinforce the continuation of exclusionary practices toward deaf pupils within mainstream schooling; a critique of the dominant historiography of the early translations of Shakespeare's drama in Egypt; an exploration of Bourdieu's concepts of habitus, capital and *illusio* in relation to the formation of the literary field in France and America in the 19th and 20th century; a re-evaluation of the potential for a theoretical alliance between Latour's actor-network theory and Bourdieu's reflexive sociology; and a discussion of the ethnographic epistemological foundations of Bourdieu's work with reference to political asylum procedures in Belgium. From varying perspectives, the papers in this volume demonstrate the contribution of Bourdieu's work toward the continued elaboration of sociological perspectives within translation and interpreting studies.

Writers, translators, and critics explore the cultural politics and transnational impact of Latin American literature.

A detailed study of fermentation in all its forms. Contents Include: Fermentation Due to Cellular Organisms, or Direct Fermentation - Historical; Alcoholic or Spirituous Fermentation; Alcoholic Ferments; Actual Composition of Ferments; Functions of Yeast; Action of Various Chemical and Physical Agents on Alcoholic Fermentation; Can Nothing but Alcoholic Yeast Excite Alcoholic Fermentation?; Viscous or Mannitic

Fermentation of Sugar; Lactic Fermentation; Ammoniacal Fermentation; Butyric Fermentation and Putrefaction; Fermentation by Oxidation; Application of the Researches and Ideas of M. Pasteur. This book contains classic material dating back to the 1900s and before. The content has been carefully selected for its interest and relevance to a modern audience.

Ce manuel, dont la visée est essentiellement pratique, propose une méthode d'initiation à la traduction professionnelle, par opposition aux exercices de traduction axés sur l'acquisition d'une langue étrangère. Il répond aux exigences particulières de formation des futurs traducteurs de métier et s'adresse tout particulièrement,

mais non exclusivement, aux étudiants des programmes universitaires de traduction. Son domaine est celui des textes pragmatiques généraux, formulés selon les normes de la langue écrite et en vue d'un apprentissage dans le sens anglais → français. Le manuel renferme 9 objectifs généraux d'apprentissage, 75 objectifs spécifiques, 85 textes à traduire, 253 exercices d'application, un glossaire de 275 notions, une bibliographie de 410 titres et des milliers d'exemples de traduction. - Ce livre est publié en français

This volume offers an important re-evaluation of early modern philosophy. It takes issue with the received notion of a 'revolution' in philosophical thought in the 17th-century, making the case for treating the 16th and 17th centuries together. Taking up Charles Schmitt's formulation of the many 'Aristotelianisms' of the period, the papers bring out the variety and richness of the approaches to Aristotle, rather than treating his as a homogeneous system of thought. Based on much new research, they provide case studies of how philosophers used, developed, and reacted to the framework of Aristotelian logic, categories and distinctions, and demonstrate that Aristotelianism possessed both the flexibility and the dynamism to exert a continuing impact - even among such noted 'anti-

Aristotelians' as Descartes and Hobbes. This constant engagement can indeed be termed 'conversations with Aristotle'.
